Teen Pregnancy Prevention Tier 2 Innovation and Impact Network Grants: Developing Innovative Interventions

How the Innovation and Impact Networks Navigated the Innovation Pipeline

The Innovation and Impact Networks

From 2020-2023, the Office of Population Affairs awarded 13 Teen Pregnancy Prevention Tier 2: Innovation and Impact Network grants. These grants are part of OPA's overall Tier 2 grant strategy to increase the number of promising approaches to prevent unintended teen pregnancy that can then be rigorously evaluated to expand the availability and diversity of evidence-based programs. Each Innovation and Impact Network grantee recruited and supported a collaborative, multidisciplinary network of partners, known as an Innovation and Impact Network. Grantees and their Networks used an iterative process to develop and test innovations for health promotion and the prevention of unintended teen pregnancies.

What were the key elements of the Innovation and Impact Networks?

Who made up the Innovation and Impact Networks?

Grantees completed a **stakeholder map** to identify individuals and organizations relevant to the projects' priority and focus population (i.e., potential network partners). These maps often included:

Innovations

- Subject matter experts in:
 - Selected priority area
 - Trauma-informed care
 - Intervention development
 - Graphic design
 - Technology
 - Technical Assistance

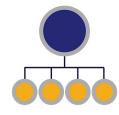

- Implementation partners and sites
- External evaluators
- Community advisory groups
- Youth advisory groups
- Youth, adults, and staff with lived experience

How were the Innovation and Impact Networks structured?

On average, each Innovation and Impact Network had **16 formal partners**. Network structures often took a co-collaborator approach or a direction setting approach.

Some **networks co-led** intervention development, testing, and refinement with **partners**.

Other **networks** provided technical assistance and other **guidance** to **partners**.
